

CALIFORNIA FRIENDS OF RECOVERY TO STOP THE CUTS

Save Addiction Prevention, Treatment and Recovery Services

This petition is being circulated by leadership organizations that provide addiction prevention, treatment and recovery services in California. We are alarmed at the risks facing our programs and the recovery community because of the current statewide budget crisis. Lawmakers may believe that they can reduce or eliminate funding for these services without accountability, but signing this petition is a statement that people in recovery, their allies and friends and the thousands of individuals who work in our California's hundreds of addiction prevention, treatment and recovery programs will not allow these lifesaving services to be dismantled.

Save alcohol and other drug prevention, treatment and recovery services now!
